

Clone the Repository

Open **Command Prompt** and run:

```
git clone https://github.com/your-username/fake-news-detection-nlp.git
cd fake-news-detection-nlp
```

2: Create (Optional) Virtual Environment

Recommended for clean dependency management.

```
conda create -n fake-news python=3.9
conda activate fake-news
```

3: Install Required Libraries

```
pip install numpy pandas scikit-learn nltk matplotlib seaborn
```

4: Test with a News Article

```
news_article = input("Enter the news article: ")
manual_testing(news_article)
```
